Presentation of the products

Join the revolution

The Conga revolution. Again.

Improvement is always a key factor, and the new Conga range takes a huge leap again introducing infinitely smarter and more powerful robots. A never-ending innovation that will shift the way we vacuum and scrub worldwide. A revolution with different technological levels making it reachable for all of us.

EVERY BODY TECH.

They're not powerful robots this time, they're ultra-powerful.

An ultra-powerful robot that multiplies by 10 the suction power, reaching up to 8000 Pa. Clean x3 in just one go with the Jalisco brush. Vacuum the deepest of rugs. Maximise scrubbing intensity and breakdown even the smallest of dirt particles.

Conga is back with the most powerful range of robot vacuum cleaners.

**Laboratory tests carried out with dolomite sand following IEC 60312-1:2010 standard.*

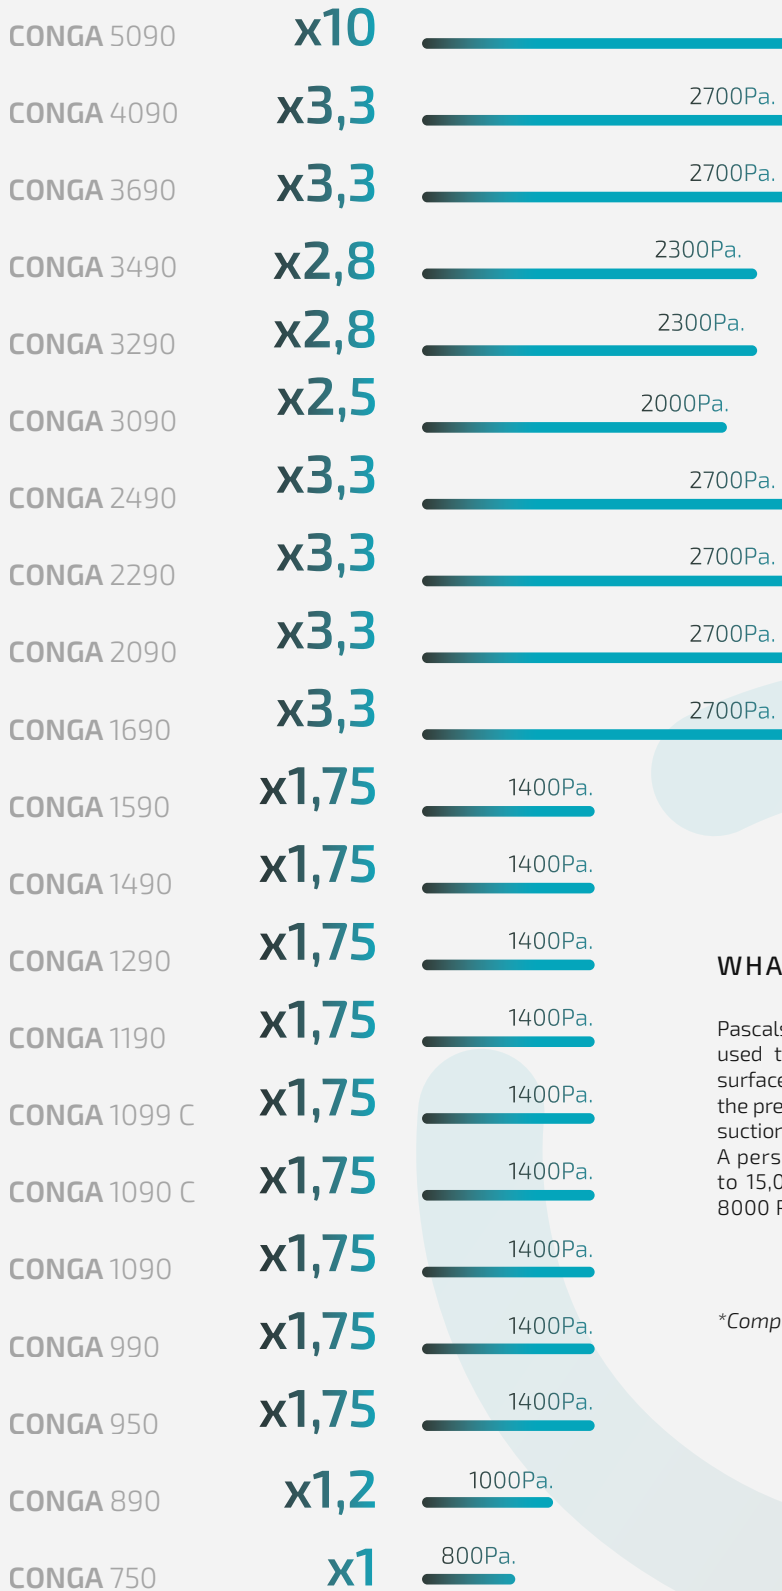

x1

x10

Ultra-power in data

8000 Pa.

WHAT ARE PASCALS (PA)?

Pascals are the pressure measuring unit used to measure the force per unit of surface area. The more Pascals, the higher the pressure and therefore the greater the suction power.

A person, when stood up, can reach up to 15,000 Pa. Our range reaches up to 8000 Pa.

**Comparison made vs the Conga 750.*

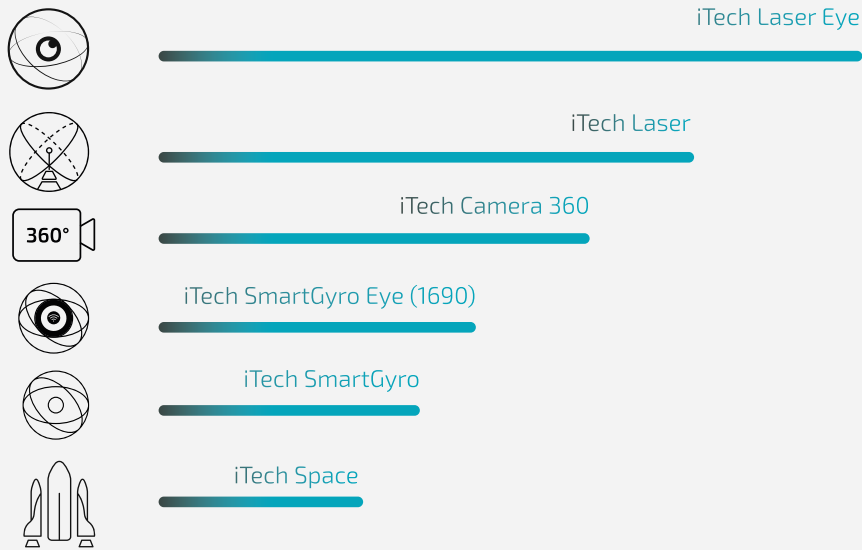

Power without control cannot get too far.

An ultra-smart robot navigates precisely. It knows where it is and what to do at every moment. It turns on when you ask it to. It allows you to program room cleaning with a simple gesture. It scrubs just like a person would, without the person. It adapts to its environment thanks to its brushes, programs and functions... A new era of smart robots.

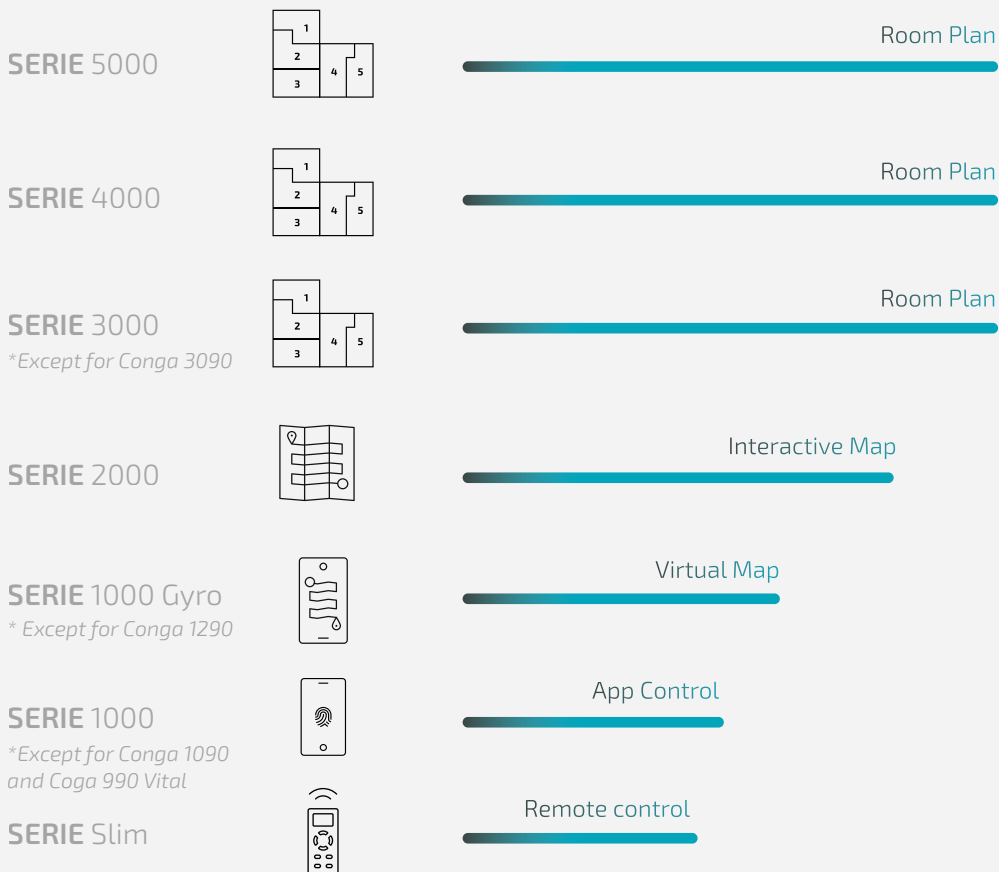

Ultra-powerful precision.

NAVIGATION TECHNOLOGY

Control your Conga.

INTERACTIVITY

Moving intelligence

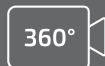

ITECH LASER EYE

Laser navigation and mapping system with optical sensor that increases precision and allows the robot to detect objects and borders, resulting in refined cleaning.

ITECH LASER

Navigation system through laser mapping, for precise moves.

ITECH CAMERA 360

Camera navigation technology that maps your house as it generates reference points, resulting in precise and organized cleaning.

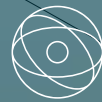

ITECH SMARTGYRO EYE

Navigation technology with gyroscopic, anti-drop and optical sensors that allow the robot to get closer to edges for a highly-refined cleaning.

ITECH SMARTGYRO

Navigation system with gyroscopic and anti-drop sensors for a more organized cleaning.

ITECH SPACE

Random-type navigation technology that detects objects through contact.

The background is a solid teal color with several large, overlapping, curved shapes that create a sense of depth and movement. The shapes are in various shades of teal, from a lighter, almost white glow to a darker, more saturated teal. The overall effect is modern and dynamic.

Technology and innovation

Powerful innovation

cecotec

Ultra-powerful

They're not powerful robots,
they're ultra-powerful.

**Power
to clean.**

**FORCECLEAN
UP TO 8000 PA**

We have the most powerful range of robot vacuum cleaners in the world. Conga 5090, with its 8000-Pa digital motor, is the high-end robot of the range. An ultra-power capable of vacuuming the deepest parts of the highest rugs.

Cyclonic ultra-power.

CY-CLEAN TECHNOLOGY

Cy-Clean is the exclusive cyclonic technology of Conga 5090 that force-separates particles through centrifugal force, amplifying suction power and resulting in extreme cleanliness of any type of surface. Innovation applied to robot vacuum cleaners like never before.

It takes one go to clean your home

JALISCO BRUSH

A new milestone for the ultra-powerful robot era, the innovative Jalisco brush. Microfibre technology that offers higher pressure, and therefore a higher suction power. It's so efficient it is capable of cleaning 3 times more dirt on rough floors in just one go.

When you need it most.

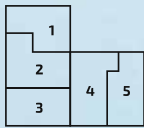

TURBO CLEAN CARPET

Not only does it have 3 different power levels (Eco, Normal and Turbo), it also combines an intelligent Turbo Clean Carpet system which automatically detects carpets.

Decide how you want to clean, room by room.

ROOM PLAN

It all starts with laser mapping, then Room Plan does the rest. View your maps at the moment, save them and edit each of the rooms in your house. You can now customize your cleaning plans by rooms: Suction power level, scrubbing intensity, schedule tasks by days... A new era has begun with these ultra-powerful and ultra-smart robots.

Plan from your mobile phone.

APPCONTROL

- Edit your home's rooms and areas.
- Delimit specific zones inside areas.
- Set up restricted areas such as a shower, children area...
- See the App map in real time.
- Save up to 5 maps, for several floors or houses.
- Create up to 50 cleaning plans, 10 per map.
- Programmable 24 hours, 7 days a week.

**Available functions depending on model*

Intelligence

Powerful, but smart.

It knows where it is and where to clean.

NAVIGATION

There are endless Navigation technologies... Laser mapping precision. The smartness of camera-aided navigation. Gyroscopic and optical sensors the locate the robot, or random navigation with proximity, bumper and free-fall sensors. Each series has its own technology.

Takes a rest and finishes its job.

TOTAL SURFACE 2.0

An ultra-powerful robot always finishes its job. In large rooms, it recharges its battery and resumes cleaning from where it stopped.

Remote control, App and virtual voice. What else could you need?

CONNECTIVITY

There's never been so many ways of communicating with a robot vacuum cleaner. Plus, it is now compatible with 2.4 GHz and 5G Hz Wi-Fi networks. A whole new technological revolution for managing your ultra-powerful robot.

**Available functions depending on model*

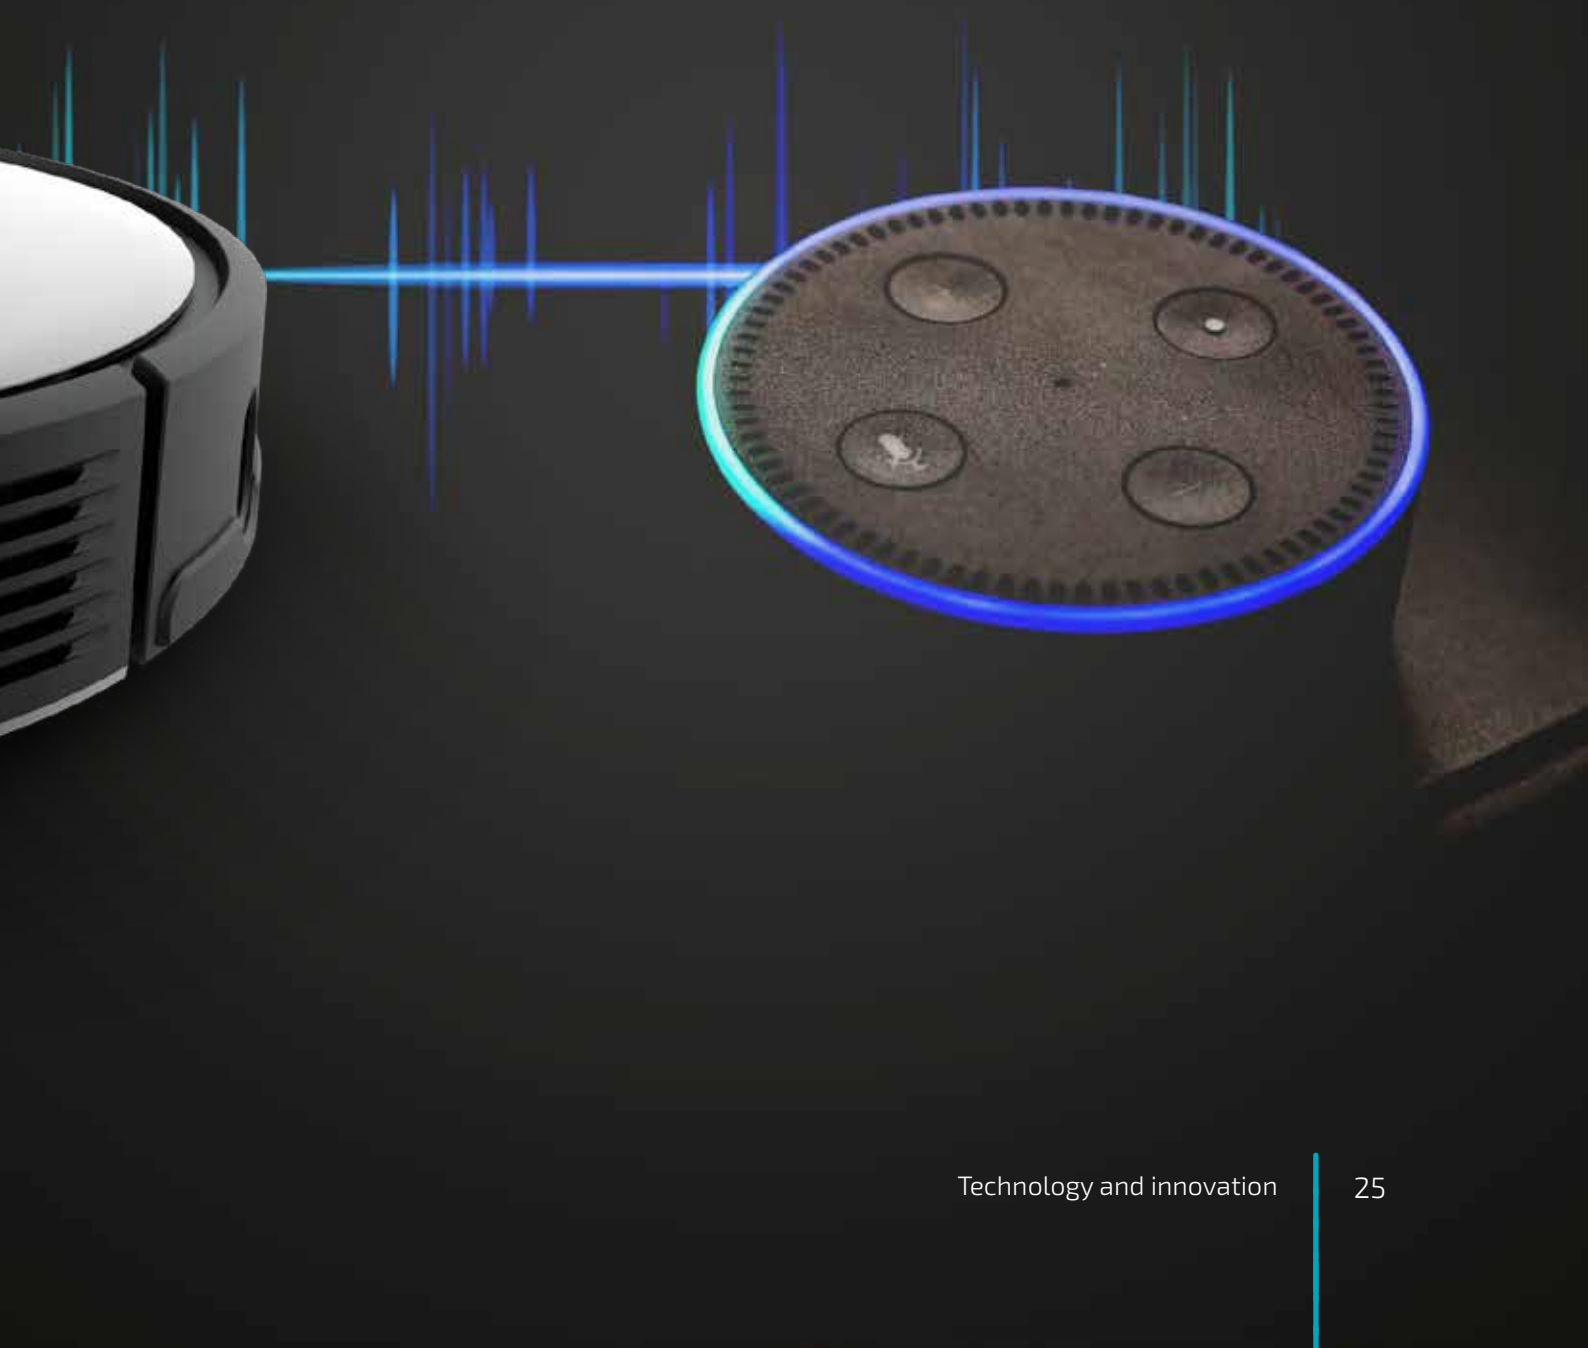

Compatible with Google and Alexa virtual assistants.

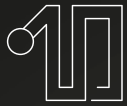

VIRTUAL VOICE

Compatible with Google Assistant and Alexa virtual assistants for you to use it through voice commands. This facilitates interacting directly with the robot.

Different modes of being smart.

UP TO 10 PROGRAMS

As each moment requires a different way of combating dust, choose: Smart Area, Restricted Area, Spot cleaning, Twice, Auto, Manual, Edge, Room, Scrubbing, Spiral and Back home.

Functions

Mr. Do-it-all.

Dressed for the occasion.

BRUSHES

Cepillo Jalisco (brush), specific for hard floors. Cleans x3 in one go.

Multifunctional brush for all types of surfaces. An all-rounder.

Silicone "Best Friend Care" brush, perfect for pet hair.

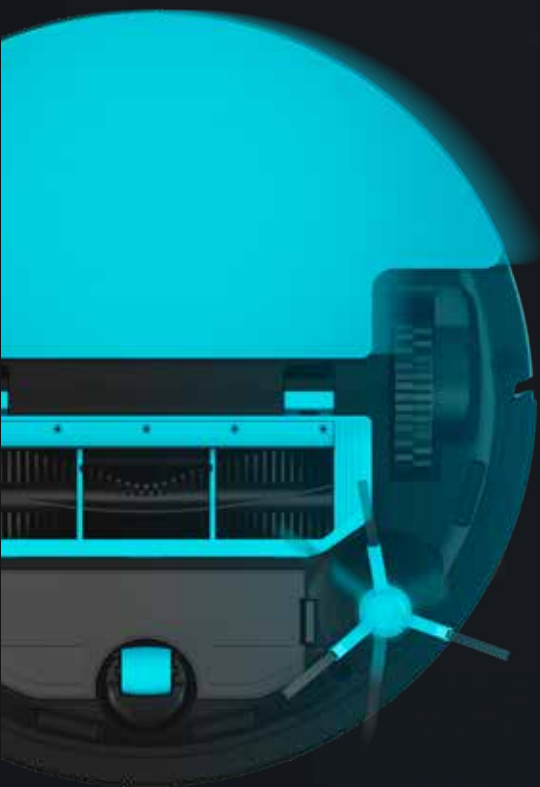

Vacuums, sweeps, maps and scrubs.

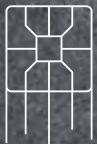

4 IN 1

The robot makes the most out of the cleaning process thanks to its Wet&Dry Tank, as it carries out 3 functions at once: vacuums, sweeps and scrubs (or mops).

The era of smart Scrubbing.

IWATER + WASH4YOU

Scrubbing system with 3 water flow levels (High, Medium and Low), 2-material mop and an efficient electronic control that makes possible scrubbing smartly.

The robot that scrubs... just like you would.

SCRUBBING

The famous patented Scrubbing movement consists of swaying moves that simulate human scrubbing motion. Pure innovation that improves scrubbing efficiency.

Series

Get to know each range in depth

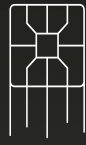

Discover smart cleaning

SLIM SERIES

The Slim series counts on the smart and innovating smart navigation system iTech, navigates with a millimeter-by-millimeter precision thanks to its proximity, free-fall and bumper sensors. Sweeps, scrubs, vacuums and mops smart and efficiently. Discover a new way of cleaning. Automatic and powerful.

4 IN 1

SERIES

Conga 750

4-in-1 smart vacuum cleaner, iTech Easy navigation and Wet accessory.

PRODUCT DETAILS:

- 4-in-1 vacuum cleaner. Sweeps, vacuums, mops and scrubs.
- Includes Wet accessory for mopping and scrubbing.
- iTech Easy Navigation: Smart proximity and free-fall sensors.
- Power Suction Pro: Great power suction.
- Automatic cleaning mode: Smart, simple and powerful.
- Silent vacuum cleaner, just 70 dB.
- Turboboost: Turbine that maximises power.
- Animal Care: Non-tangle vacuuming mode for pets.
- Lithium battery, 10.8 V and 2600 mAh, doubles the vacuum cleaner's service life.
- 70 to 100-minute run time with 3 to 4-hour full charge.
- High-efficiency professional filtering that removes 99.98 % of allergens.
- Suitable for all types of floor and carpets.
- Power Suction Pro: Great power suction, 800 Pa.

COMPOSITION:

- Smart robot vacuum cleaner
- Adapter
- 4 side brushes
- 2 high-efficiency filters
- 1 auto-cleaning brush
- Scrubbing and mopping accessory
- Instruction manual
- Wet tank

Conga 950

4-in-1 robot vacuum cleaner. iTech Space smart technology. 1200 Pa. Turbo carpet. 3 power levels.

PRODUCT DETAILS:

- Professional 4-in-1 robot vacuum cleaner: Sweeps, vacuums, mops and scrubs the floor.
- iTech Space technology: Smart and organized navigation with proximity, bumper and free-fall sensors.
- Wash4You system: Mops and scrubs smartly thanks to its electronic valve that doses and distributes water homogeneously.
- Force Implode system: Powerful turbine that maximises its great suction power of up to 1400 Pa.
- 1400 Pa.
- The Specialized 5: 5 cleaning modes: Auto, Edges, Room, Spiral and Back home.
- 3 power levels: Eco mode (800 Pa) for minimum consumption, Normal mode (1200 Pa) for daily cleaning and Turbo mode (1400 Pa) for thorough cleaning.
- Turbo Clean Carpet system for cleaning carpets at top power.
- Silent cleaning thanks to its Only Silence technology, which produces a <64 dB noise level.
- Large non-tangle suction nozzle that always keeps suction power at 100 %.
- Ideal for pet's hair.
- Twin Floor mop to carry out professional cleaning over all types of surfaces.
- All-TimeTable: Program cleaning tasks 24 hours, 7 days a week.
- Automatically returns to the charging base when it has finished cleaning thanks to its Always Home system.
- Remote control and LCD display to control your robot in the easiest and most intuitive way.

COMPOSITION:

- Robot vacuum cleaner
- Dust tank
- Wet tank
- 2 mops made of 2 different materials
- 2 high-efficiency filters
- Auto-cleaning brush
- Charging base
- 4 side brushes
- Remote control

SERIES

Conga 3090

4-in-1 robot vacuum cleaner, smart navigation and predictive iTech Laser 360, Scrubbing system and interactive map where you can set selected and restricted areas.

PRODUCT DETAILS:

- 4 IN 1: Robot vacuum cleaner that sweeps, vacuums, mops and scrubs.
- Smart iTech Laser 360 navigation. The robot scans and maps your house through a 360-degree recognition. Plans the quickest, most efficient, organized and smart cleaning route.
- Alexa and Google Assistant virtual assistants.
- Scrubs for you! Scrubbing system, smart scrubbing and professional results.
- Its area cleaning allows selecting the specific rooms you want it to clean.
- Set restricted areas with limits to block areas which you do not want the robot to clean.
- Choose the cleaning mode of a specific spot for the robot to clean that specific area in the map.
- Schedule it weekly, check the cleaning record and time, check the interactive map through the laser technology, detect the charging base, set restricted areas, cleaning areas and spot cleaning with the App.
- Turbo Clean Carpet system that activates the turbo mode in carpets.
- Force Clean 2000 Pa: Great power suction up to 2000 Pa.
- Total Surface 2.0 technology: The robot automatically returns to the charging base when it runs out of battery, charges its battery and resumes the cleaning process until it finishes it.
- 10 cleaning modes: Area, Restricted area, Spot cleaning, Twice, Auto, Edge, Scrubbing, Spiral, Manual and Back home.

Cyclonic ultra-power.

5090

Conga 5090 is the world's most powerful robot. Cy-Clean is an exclusive cyclonic technology that force-separates particles through centrifugal force, amplifying suction power. Its 8000-Pa digital motor, the Jalisco brush and the precision iTech laser allow extreme cleaning on all kinds of surfaces. An ultra-power capable of vacuuming the deepest parts of the highest rugs.
